

WHAT IS THIS?

A module for TTRPG, the lewd kind for **bondage kink**.

It is part of a bigger project that's taking time so I wanted to see if I could make this part self-contained enough to attach itself to other RPG.

Kinda lite in description for now, connoisseur should not mind, it's focused on binding rules.

GENERAL BINDING RULES

The **Restrain level** table set the condition to attempt escape.

As an attribute bindings does not stack, only the highest **Rlvl** count.

The **Effect table** set the physical limit on the character.

Effects combine and **Rlvl** stack but binding effect must be escaped separately.

Count as restraint items or outfit that:

- impede physically/magically
- impede socially (slave collar, gag)
- or cannot be removed by oneself without using both hands (armor, strict clothing)

Restraint level (Rlvl)	Restriction
1	Can be removed by oneself (two hands)
2	Can only be removed by oneself with action/tool/magic
3	Can only be removed by others, with two hands (unreachable knots/fastening)
4	Can only be removed by others with action/tool/magic.
5	Cannot be removed without serious injuries
6	Can only be removed by event or magic beyond your reach

Binding:

Binding require two-hands outside exception like prepared noose, spells, tools.

Escape:

Rlvl1: Roll for detection

Rlvl2: Roll for action with tool/magic + detection

Rlvl3+: Require actions that bring it back to **Rlvl2**

ex:

Cut a binding = being able to move/grab a blade

Damage a cuff = being able to melee

Dislocating a limb to escape = roll for damage

Modifier:

Loose: on a failure **Rlvl(-1)**, negate **harness**

Normal: a successful tie

Extra tight: willingly or another failure. Inflict **weak(1)**, **DMG 2p** if engaging in melee.

Torture tight: willingly or a critical failure. Inflict **weak(1)**, **DMG 1p** per bind + **2p** if engaging in melee

Size/species/magic modifier:

It should be easy enough to increase/decrease ropes/cuffs cost and add/ignore effect.

You can also involve magic canceling effects or magic bind that decrease attribute like strength.

Ex: Lamia tail can't be bound easily, therefore **slow()** effect wouldn't apply without more ropes.

Ex: Small creature can't be cuffed easily, therefore solid cuffs would be Loose and suffer **Rlvl(-1)**.

ROPE BINDING RULES

Improvising rope flavor

2 ropes per **Rlv1**

Distribute effects: 1 rope per tier

ex: 4 ropes bind = **Rlv2**

- a) Can't melee
- b) Slow(2) + Melee(-2)
- c) grab(-1) + Slow(-2) + Harness
- d) ...

It cost a lot of rope to make harmless/immobile/helpless&silent because escape must remain a possibility and by **Rlv3** binding effects can't be escaped without (limited) actions.

It also it discourage players from rolling their entire ropes supply on a victim.

Regular rope flavors

(a master train to do stricter bind using less ropes)

Rlv1	Item qty	Flavor	Effect
1	1 rope	Rope cuff/collar	
1	1 rope	Rope gag	Can't talk
1	1 rope	<flavor> bound to <object>	Can't move

3	6 rope	(advanced) Arms+wrists bound to body harness	Harness, grab(-1), Melee(-3), Can't target, slow(1), Excite(2)

SOLID BINDING RULES

Count as solid binding what cannot be reshaped easily even with magic.

1 action to link/unlink

1 action to cuff/uncuff

Solid binding may be **(locked)** and require tool/equipment

Attribute like lockpicking difficulty can be set with a roll.

Locked fastening is **Rlv2**

Unreachable fastening is **Rlv3**

Unreachable fastening locked is **Rlv4**

Ex:

Rlv	Item qty	Flavor	Effect
2	1 collar	(locked) Metal collar	Social effect / slavery
2	1 chain	(locked) <flavor> bound to <object>	Can't move
2	2 cuff	(locked) Wrists cuffed	Melee(-1)
2	1 collar + 2 cuff	(locked) Metal collar to cuffs	Melee(-2)
2	4 cuff	(locked) Hogtie	Can't melee, slow(3)

Rlv	Item qty	Flavor	Effect
3	Metal-fiddle	(unreachable fastening) Metal-fiddle	Melee(-1)
3	Arm-collar spreader	Arm-collar spreader	Grab(-1), Melee(-1)
3	4-cuff-spreader	Wrist+ankle cuffed to spreader	Grab(-1), Can't melee, Can't target, Can't move

Rlv	Item qty	Flavor	Effect
4	Solid cuffs	(unreachable fastening) (locked) Spread wrists cuffed	Melee(-1)
4	Arm-collar spreader	(locked) Arm-collar spreader	Grab(-1), Melee(-2)

OTHER RESTRAINT

You can set attribute to overcome, like resistance to strength, or agility score to slip out.

Reminder:

Rlvl(1) require 2 free hands.

Rlvl(2) require efforts/tool/magic
