Councils.

If you have no opportunity to unpack model paper on a cardboard or the dense paper, then having printed on normal paper, you will need to transfer details to a cardboard. There are several options of transfer of details:

1. The leaf with the printed details on a cardboard will suppose and to cut together cutting the printed leaf and a cardboard. Beforehand it is also possible to cut roughly a leaf on a part, having separated thereby details from each other. Then to paste them to a cardboard on an adhesive tape.
2. Having put printed foxes to a cardboard, by means of a needle (the compasses needle for this purpose will approach), to puncture in total detail angles on a cardboard, to start then cutting details on these points. Such method will allow you to preserve also safety sheets with the printed details.
